

# **PROXIMITY** creates solutions that bring people together

*For more than 25 years, our family-run company has been building cabinets that don't just enhance efficiency, but actually help to improve person-to-person interactions. Proximity understands that patient care is the top priority at acute and long-term care facilities. That's why our cabinets and wall-mounted workstations offer flexible solutions for point-of-care providers. Proven to reduce errors and infections, Proximity's systems are designed to meet the workflow and ergonomic needs of your staff, as well as the service expectations of your patients.*

*Our desire after 25 years is to provide high-quality products that create solutions for customers, and we continue to operate under the same principles:*

- *Build a product that has integrity.*
- *Have pride in what we do.*
- *Continue to deliver a solution that improves the lives of the people who interact with technology.*

*American-made in our Houston, Texas manufacturing facility, our workstations and cabinets are currently installed in more than 1,500 facilities in the US.*

Care within Reach.
